

Transit Notice

Line 2 - Keele to Dundas West stations Preliminary track work

Scheduled Date: Starting June 28, 2017 (nightly)

*Content/timeline accurate at time of printing

Subway service will be suspended on Line 2 between Keele and Ossington stations on the weekend of July 15/16 in order to carry out a variety of work. This will include rail and wood-tie replacement in the open-air section between Keele and Dundas West stations.

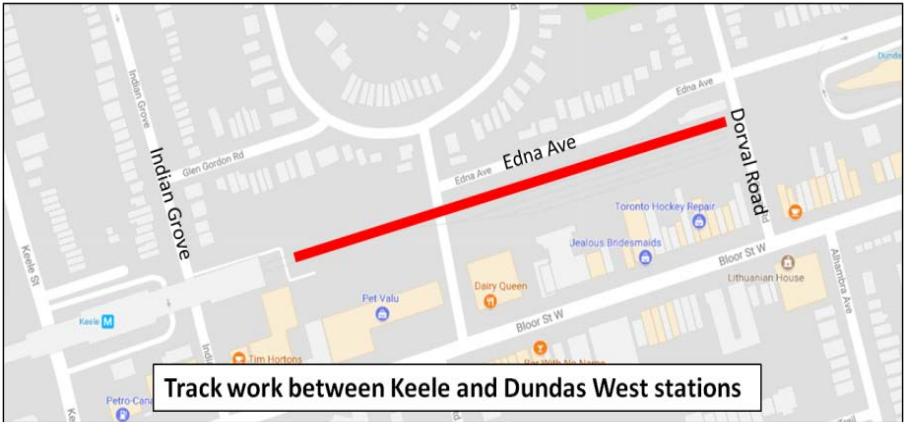

Advance work – starting June 28

- **Prior to the subway weekend closure some preparation work is required**

To ensure that the rail and wood-tie replacement work can be completed during the scheduled weekend closure, preliminary work is required.

Starting June 28 after regular subway service ends, track crews will begin removing ballast/stones along a section of track between Keele and Dundas West stations.

This activity will occur nightly leading up to the weekend closure.

- **Description**

Two subway work-cars will be used nightly at track level between Keele and Dundas West stations to vacuum/remove the old ballast (stones) and expose the wood-ties that support the mainline tracks. This method of removing the ballast from the track area is quick and less likely to cause damage to existing underground cabling and possible disruptions to subway service.

Additional night work will be required after the weekend closure in order to tamp the new ballast and stabilize the track system into place.

The equipment used will generate some noise when in full operation.

Work hours

This preliminary work can only be carried out overnight when the subway is not in service (approx. 2 a.m. to 5:30 a.m. Monday to Saturday and until 7:30 a.m. on Sunday) and will continue nightly up to the weekend closure. Regular subway service resumes in the morning.

Note: Trains will operate at a reduced speed both ways through the work area for the duration of the project.

Thank you for your patience as we improve transit in Toronto.
