## Keele Station Improvements Station Power Upgrade – night work

**Dates:** March 25 to April 1, 2018

\*Content/timeline accurate at time of printing

### Work description and purpose

TTC is currently upgrading the electrical power at Keele Station. The upgrade is necessary for the future operation of elevators slated at this station.

During the electrical upgrade work from March 25 to April 1, TTC's contractor will be using two generators placed at the north side of the bus loop. The generators will be delivered in advance of the work on March 22 at 2:30 a.m.

Electricity to the community will not be affected by this work.

### Temporary generator operation

The generators will run continuously from March 25 to April 1. Although the generators are self-contained, some noise may be evident when it is in operation.

### Work hours

While the majority of the work is inside the station, work will take place nightly between 2:30 a.m. and 5 a.m.

During this work, noise from the crane, beeping sounds from construction vehicles and other construction related activities may be audible to area residents.

### TTC service

There will be no impact to station operations.

*Thank you for your patience during these electrical upgrades.*
